## DIGITAL BIOPIRACY TO UNDERMINE INTERNATIONAL TREATIES THAT PROTECT BIODIVERSITY AND PREVENT BIOPIRACY

In 1992, the International community created the UN Convention on Biodiversity (CBD)<sup>1</sup> which recognised the sovereignty of communities and countries to their biodiversity and knowledge. The Nagoya Protocol<sup>2</sup> under the Convention was meant to regulate the access to Biodiversity. Similarly, consequent to the FAO conference on Plant Genetic Resources in Leipzig in 1996<sup>3</sup>, the International Treaty on Plant Genetic Resources, or Seed Treaty<sup>4</sup> was negotiated in the FAO.

Gates, and his push to digitalise every aspect of life, undermines the CBD and the FAO Seed Treaty through Digital Sequence Information (DSI)<sup>5</sup> and patents based on digital genome mapping.
