...AND THE EARTH**

A GLOBAL CITIZENS' REPORT

Coordinated by

## GLOBAL RESISTANCE TO GENETIC EXTINCTION TECHNOLOGY

Besides constantly exposing the dangers of releasing the untested technology of Gene Editing and Gene Drives in the environment, as well as the lack of transparency in the decision process<sup>1</sup>, independent scientists, indigenous peoples, and civil society movements across the world have constantly been carrying out actions of resistance.

In December 2016, over 160 civil society organisations from six continents called for a “Moratorium on New Genetic Extinction Technology” at the 2016 UN Convention on Biological Diversity (CBD) in Cancun, Mexico<sup>2</sup>. This moratorium call included both lab research and field trials, because of the potentially devastating effects that synthetic biology can have on entire ecosystems<sup>3</sup>.

Even though the moratorium found support among some countries, the final agreement merely urged caution in field-testing the products of synthetic biology, including gene drives, while supporting better risk-assessment of the products' potential effects<sup>4</sup>.

There has been no lack of attempts by the industry, through a Gates-funded lobby firm, to manipulate the UN decision-making process over gene drives, as emerged from a set of documents, released in December 2017, revealing how external actors with interest in the development of gene drives coordinated among themselves to influence the work of the relevant UN expert group<sup>5</sup>.

In July 2018, The European Court of Justice ruled that organisms obtained by mutagenesis plant breeding techniques are GMOs and should fall under the GMO Directive<sup>6</sup>.

The court ruling was seen as a victory for environmentalists while the agrifood industry and farmers organisations started a lobbying campaign to roll-back the ECJ ruling in favor of a new EU legislation<sup>7</sup>.

Independent scientists publicly demanded precaution<sup>8</sup>, stating that gene-edited products must be strictly regulated with full recognition of the uncertainties of the gene-

editing process – and that they must be labelled to enable farmer and consumer choice<sup>9</sup>.

In October 2018, in view of the 2018 CBD Conference of the Parties (COP), a broad alliance of indigenous peoples and civil society organizations published a “Call to Protect Food Systems from Genetic Extinction Technology”<sup>10</sup>. All the while, a coalition of European movements called upon the European Commission to support an international moratorium on the release of organisms modified by gene drive technology into the environment<sup>11</sup>.

The global decision passed at the 2018 CBD COP, did not issue any moratorium, but set further barriers to the release of gene drives, by reinforcing as a priority the need to seek free, prior and informed consent or approval from all potentially impacted communities and Indigenous Peoples before even considering environmental release of gene drive organisms<sup>12</sup>.

Along the same lines, in 2020, a similar coalition of European movements has requested that the EU Commission fully supports the EU Parliament's call for a global moratorium on the release of Gene Drive Organisms, in view of the EU preparation for the upcoming Conference of the Parties (COP15) to the Convention on Biological Diversity (CBD) and the Cartagena Protocol on Biosafety (COP-MOP10)<sup>13</sup>.

In the UK, Beyond GM, GM Freeze and GM Watch started a mobilization campaign<sup>14</sup> in July 2020, in response to a proposed amendment<sup>15</sup> to the Agriculture Bill, that would give the Secretary of State for the Environment, Food and Rural Affairs (currently George Eustice) the power to change the definition of a genetically modified organism (GMO) and re-classify many forms of genome editing as non-GM. Meaning that gene-editing / genetic modification techniques would no longer be regulated and could be used on farms and in food without public knowledge or consent.

In its last meeting before the summer recess, the House of Lords finally withdrew the amendment but only after the government renewed its commitment to push, promote and facilitate the wide use of genome editing in the future of UK farming and food<sup>16</sup>.

First edition October 2020

#### **Navdanya Team:**

**Editors:** Vandana Shiva, Caroline Lockhart.

**Additional Research and Editing:** Carla Ramos Cortés, Elisa Catalini, Ruchi Shroff

**Translations:** Elisa Catalini, Carla Ramos Cortés

**Front Cover Illustration:** Federico Zenoni

**Layout:** Elisa Catalini

#### **Authors:**

Vandana Shiva, founder of Navdanya Research Foundation for Science, Technology and Ecology (India) and President of Navdanya International.

Farida Akhter, founding Executive Director of UBINIG, Bangladesh.

Fernando Cabaleiro, Attorney at law (University of Buenos Aires), Naturaleza de Derechos, Argentina.

Community Alliance for Global Justice/AGRA Watch.

GM Watch.

Nicoletta Dentico, journalist, and director of the global health program of Society for International Development (SID).

José Esquinas Alcazar, former Secretary of the FAO Intergovernmental Commission on Genetic Resources for Food and Agriculture and Chairman of the FAO Ethics Committee for Food and Agriculture.

Seth Itzkan, Co-founder and Co-Director of Soil4Climate Inc.

Dru Jay, Coordinator of GeoengineeringMonitor.org, writer and activist in climate justice and Indigenous solidarity movements, based in Montreal, Canada.

Aidé Jiménez-Martínez, MA in Sciences, Director of Regulations of Biosafety, Biodiversity and Genetic Resources, SEMARNAT, Mexico.

Satish Kumar, Founder of Schumacher College, England, UK.

Jonathan Latham, molecular biologist and former genetic engineer. He now edits the website Independent Science News.

Mantasa, Indonesia.

Chito Medina, founding member of MASIPAG (Farmers-Scientists Partnership For Development), and former National Coordinator of the network. Associate Professor of environmental science in a leading university in the Philippines.

Zahra Moolo, Kenya, Investigative journalist, documentary filmmaker and researcher on extractive industries, land rights, conservation and security. ETC Group, based in Montreal, Canada.

Silvia Ribeiro, Uruguay, Journalist, lecturer, writer, and educator on emerging technologies, Latin American Director, ETC Group, based in Mexico City.

Adelita San Vicente, Doctor in Agroecology, Director General of the Primary Sector and Natural Resources, SEMARNAT, Mexico.

Tapsoba Ali de Goamma; Human rights activist; Ecologist; President of the Terre A Vie association; Spokesperson for the Collectif Citoyen pour l'Agroécologie (Citizen's Collective for Agroecology), Burkina Faso.

Jim Thomas, Co-Executive Director and Researcher, focusing on emerging technologies on human rights, biodiversity, equity, and food systems, ETC Group, currently based in Canada.

Timothy Wise, Senior Advisor at the Institute for Agriculture and Trade Policy (IATP).
