A GLOBAL CITIZENS' REPORT

Coordinated by

SCIENTIFIC TERRORISM IN BURKINA FASO

Tapsoba Ali de Goamma

After the failed adventure of genetically modified cotton¹, a future programmed drama is underway in Burkina Faso. Indeed, under the fallacious pretext of helping to fight malaria, Burkina has become an open-air laboratory where populations are used as guinea pigs by the hazardous experience: we are talking about the genetic manipulation of mosquitoes under the leadership of the Target Malaria Project².

Genetically modified mosquito eggs were imported from the Imperial College of London to Burkina Faso in November 2016. The Burkina Faso Institute for Health Science Research (IRSS) is the project leader in Burkina³.

This s project is a concentration of lies:

1-Problem of informed population consent.

In the work with the populations of the Bana and Souroukoudingan villages, the Target Malaria project used the fight against malaria as an argument to convince these populations to accept the experimental release in their villages of GM mosquitoes resulting from classical transgenesis (GM non- gene drive organism (GDO) mosquitoes) in 2019 (phase 1 of the project). There was no real free and informed consent but rather an abuse of the ignorance and illiteracy of local communities, the term GMO was never mentioned, nor explained.

2-Absence of clear experimental conception

According to the Target Malaria Project, "The purpose of the small-scale release is to collect scientific data on the longevity and dispersal of released mosquitoes, and it will serve also to strengthen the capacities and operational experience of our teams"⁴. The first release took place in July 2019; 6400 GM mosquitoes were released into the wild⁵. Up until now, no impact study of this release, and no risk assessment has been made, creating a situation which is contrary to the elementary ethics of medical experimentation.

3- Absence of correct population information

The TM project expects three phases of the project. The first two concern the releases of classical type GMO mosquitoes resulting from transgenesis (a genetic manipulation based on the transfer of genes between the very different species that do not normally cross in nature) and the third - the releases of GDO mosquitoes or GMOs resulting from a gene drive.

This third phase is scheduled for 2024, but the local communities know nothing about the health and ecological hazards of what will happen, they know nothing about the real nature of the experimentation that will take place in their villages.

Uncertain Project Impact

Gene drive is a new technology that causes the extermination of the entire species and it is this operation of extermination which is aimed at the *Anopheles gambiae* species which, according to Target Malaria, must be enabled to eliminate malaria. The populations are neither informed of the third phase of the project, nor of the technology of species extermination that will be used. Moreover, the *Anopheles gambiae* is not the only mosquito species that transmits malaria in Burkina Faso⁶, there are others, such as *Anopheles arabiensis* and *Anopheles funestus*. The impact of the removal of one among several mosquito species is uncertain.

March against Target Malaria, Burkina Faso, 2019

Ethical violations

Target Malaria offers the inhabitants of the villages a small income under conditions qualified as the basic ethical violation - be paid for accepting to be bitten by mosquitoes is an absence of respect for indigenous people, which is contrary to the Declaration of Helsinki of the World Medical Association which governs medical research.

Since the announcement of the Target Malaria project, the civil society has mobilized to say NO to this dangerous project and is determined to remove it from Burkina Faso, as they had already done with Monsanto⁷.

First edition October 2020

Navdanya Team:

Editors: Vandana Shiva, Caroline Lockhart.

Additional Research and Editing: Carla Ramos Cortés, Elisa Catalini, Ruchi Shroff

Translations: Elisa Catalini, Carla Ramos Cortés

Front Cover Illustration: Federico Zenoni

Layout: Elisa Catalini

Authors:

Vandana Shiva, founder of Navdanya Research Foundation for Science, Technology and Ecology (India) and President of Navdanya International.

Farida Akhter, founding Executive Director of UBINIG, Bangladesh.

Fernando Cabaleiro, Attorney at law (University of Buenos Aires), Naturaleza de Derechos, Argentina.

Community Alliance for Global Justice/AGRA Watch.

GM Watch.

Nicoletta Dentico, journalist, and director of the global health program of Society for International Development (SID).

José Esquinas Alcazar, former Secretary of the FAO Intergovernmental Commission on Genetic Resources for Food and Agriculture and Chairman of the FAO Ethics Committee for Food and Agriculture.

Seth Itzkan, Co-founder and Co-Director of Soil4Climate Inc.

Dru Jay, Coordinator of GeoengineeringMonitor.org, writer and activist in climate justice and Indigenous solidarity movements, based in Montreal, Canada.

Aidé Jiménez-Martínez, MA in Sciences, Director of Regulations of Biosafety, Biodiversity and Genetic Resources, SEMARNAT, Mexico.

Satish Kumar, Founder of Schumacher College, England, UK.

Jonathan Latham, molecular biologist and former genetic engineer. He now edits the website Independent Science News.

Mantasa, Indonesia.

Chito Medina, founding member of MASIPAG (Farmers-Scientists Partnership For Development), and former National Coordinator of the network. Associate Professor of environmental science in a leading university in the Philippines.

Zahra Mooloo, Kenya, Investigative journalist, documentary filmmaker and researcher on extractive industries, land rights, conservation and security. ETC Group, based in Montreal, Canada.

Silvia Ribeiro, Uruguay, Journalist, lecturer, writer, and educator on emerging technologies, Latin American Director, ETC Group, based in Mexico City.

Adelita San Vicente, Doctor in Agroecology, Director General of the Primary Sector and Natural Resources, SEMARNAT, Mexico.

Tapsoba Ali de Goamma; Human rights activist; Ecologist; President of the Terre A Vie association; Spokesperson for the Collectif Citoyen pour l'Agroécologie (Citizen's Collective for Agroecology), Burkina Faso.

Jim Thomas, Co-Executive Director and Researcher, focusing on emerging technologies on human rights, biodiversity, equity, and food systems, ETC Group, currently based in Canada.

Timothy Wise, Senior Advisor at the Institute for Agriculture and Trade Policy (IATP).
